6D ATR 2 ODS

OMNI-DIRECTIONAL SUSPENSION

HELMET TECHNOLOGY

DESIGNED TO PROTECT YOUR BRAIN.

THE WORLDS ONLY FULL SUSPENSION HELMET TECHNOLOGY

SIGNIFICANT REDUCTION IN CONCUSSION RISK ACROSS THE WIDEST RANGE OF CRASH IMPACTS.

WHEN IT COMES TO YOUR HEAD, NOTHING IS WORTH COMPROMISING YOUR SAFETY.

DON'T GET TRIPPED UP BY LOWER PRICES, INCOMPLETE SAFETY SYSTEMS, GRAPHICS, OR OTHER SPONSORSHIPS.

Two Helmets in One / The Worlds Foremost Concussion & Traumatic Brain Injury Mitigation Technology / The Only Rebuildable Helmet In the World / NFL Head Health Challenge Winner

- Because I wanted the best possible brain injury protection for myself, my employees and our racers and ambassador athletes. As a brand deeply familiar with helmets and helmet technology, we've done our homework with several years of research.
- Our crew has ridden (and sometimes crashed) in virtually every high quality helmet system available.
- We analyzed the data and studied the science behind every new or leading technology.
- We had serious discussions with some of the best brands and leading manufactures.
- We observed an increased ratio of concussions from a few top AMA SX/MX racers when they switched away from 6D.
- We observed a decrease in concussions and brain injury from our own staff and sponsored racers in crash impacts with 6D helmets and now understand the reason -
- 6D's ODS Technology provides an additional, patented full suspension system, essentially two helmets in one, to measurably reduce impact energy transfer to your brain at every impact speed, in every impact angle, and in every crash event.

- They were the first, and have created something that is effective and meaningful. In fact, every other brand would not be chasing them if this was not the case! And this single reason is why we chose them as a partner for our customers and our friends.
- Yes, we know that you can still have a concussion with a 6D helmet, but that doesn't mean it didn't do its job! Thinking about the risks here, you would hate to be second guessing your purchase decision after a severe crash event that really tested your helmet.
- In our research, we've discovered that In fact, some brands are less than half as effective in mitigating (reducing) angular acceleration and linear impact energy as the 6D.
- From my perspective, having suffered "20+ dirt bike and snowmobile crash related concussions", I feel responsible to inform people, particularly super users who constantly put themselves at risk to do yourself and your loved ones a favor; don't take shortcuts with your helmet!
