AVAILABLE IN SELECT FXR MEN'S, WOMEN'S OUTERWEAR & ALL FXR CHILD/YOUTH OUTERWEAR

Don't compromise performance and comfort when safety is a top priority. A wide variety of our men's, women's premium outerwear integrates lifesaving, lightweight F.A.S.T. Float Assist Safety Technology. In our commitment to child safety all FXR child/youth outerwear jackets, pants, and monosuits feature F.A.S.T.

IS YOUR FAMILY SAFE?

The cold shock response is the first thing to occur after entering freezing water. An initial involuntary deep gasp is followed by massive hyperventilation that can be up to 1000% greater than normal breathing. If the rider's airway is below the waterline at this time, the rider risks drowning.

F.A.S.T.™ technology brings the rider to the surface quickly, keeping the head above water while the rider gets through the initial Cold Shock Response as well as leveling off their body to prepare to exit the water.

Cold incapacitation begins to set in during the first 10 minutes of immersion. Loss of use of fingers/arms/legs leads to swim failure, and eventually drowning, if the rider is not able to get out of the water quickly and is not wearing a floatation suit. The fit/cut of FXR FAST Outerwear items not only allows freedom of mobility on the sled, but also when maneuvering in the water.

F.A.S.T.™ Insulation retains buoyancy properties for up to 2hrs, and is strategically positioned within the suit to allow unrestricted movement, both on the sled, and getting out of the water. It's extremely important to wear FAST items as a complete suit, with FAST insulation in both jacket and pant, or monosuit, and is essential to providing the crucial buoyancy needed in the lower body to lift the legs upward while exiting the water.

Each gallon of water that is trapped inside the suit is equal to an additional 10lbs of weight, which can make survival and exiting the water extremely difficult, especially on thin ice. Rapid Drain inserts in the jacket/pants allow water to drain as the rider exits the water, reducing the weight and effort required to exit as well as reducing the risk that the ice will break through again.

Once out, F.A.S.T.™ retains its thermal properties even when wet to keep body temperature from dropping and giving the rider the best chance to seek warmth and shelter.

A.C.M.T.[™]
ADVANCED CLIMATE MANAGEMENT TECHNOLOGY

HYDRX PRO[™]

HYDRX PRO[™] OUTER LAYER WATERPROOFING

- Durable Outer Shell with HydrX Pro[™] Membrane repels 99% of external moisture from entering the jacket.

HYDRX PRO[™] INNER LAYER WATERPROOFING

- Seam-Sealed Inner Lining with HydrX Pro[™] Membrane acts as a 2nd Waterproof/Breathable barrier, stopping external moisture, and creating a semi-sealed air space between the layers of the garment.

INNER MICRO-CLIMATE

- The air space between the ACMT[™] Lining and the outer shell creates an Inner Micro-Climate, allowing the outer shell and inner lining to function at different temperatures.

BREATHABILITY

- The warmer temperature of the inner ACMT[™] Lining allows the inner HydrX Pro[™] Membrane to maintain breathability.

ANTI-CONDENSATION

- The temperature of the inner ACMT[™] Lining remains warm enough to stay above the Dewpoint, reducing inner condensation the exact same way that a dual goggle lens reduces fogging and frost build-up on the inner lens.

DryVent[™] system

- Warm, moist air can now be exhausted from the garment through the Dry Vent System, effectively moving inner heat, moisture vapor, and sweat away from the body so that the rider stays dry from within.
- Seam-sealed Dry Vent Mesh eliminates snow ingestion in all snow conditions, including bottomless powder or wet snow.
- Allows air exchange between the layers of the garment, even when zips are closed.

ThermalDry[™] ACTIVE LINER

- Key to the overall comfort, warmth, and breathability of the garment.
- Remains flexible at any temperature.
- Allows for maximum breathability through moisture-wicking mesh layers & Thermal Flex Insulation.

Dri-LINK™

Provides protection from the elements like a monosuit with the mobile fit of a two piece suit.

FXR's exclusive Dri-Link™ technology allows a 2pc suit to be connected at the waist with a 360° zipper system, giving it similar protective properties to a monosuit, from both cold temperatures and snow ingestion.

The Dri-Link™ acts as an expansion gusset. Allowing short or tall riders to adjust the waist height and inseam to their preference. This increases mobility and allows the rider to move their legs freely.

Dri-Link™ Systems Sold Together as Monosuit

Step 1: Untuck Dri-Link™ from pant (stow away when not in use)

Step 2: Connect zipper on Dri-Link™ to zipper rail on jacket and pull zipper around, connecting the jacket to the pant.

Step 3: Connect front zipper, fully sealing the Dri-Link™.

Dri-Link™ Systems Sold Separately

The Dri-Link is a size-specific component, if purchasing a mis-matched suit, the Dri-Link size should match the Pant size.

Step 1: Unzip Windskirt from jacket (Stow away when not in use)

Step 2: With the Dri-Link logo facing outward and upward, align the longest zipper on the Dri-Link to the left side of the jacket, connect the Dri-Link to the jacket

Step 3: Raise the flap on the waist of the pant, align the zipper to the left side of the pant, connect the zipper around the waist, being careful not to catch material in the zipper teeth

Step 4: Connect front zipper, fully sealing the Dri-Link

ACMT™ Advanced Climate Management Technology is FXR's proprietary collection of dry mesh venting, dual-layered HydrX Pro™ laminates and seam sealed linings, creating a Dual Layer Moisture Shield. This elite combination dramatically improves an outerwear garment's ability to maintain waterproofness, breathability, reduce condensation, and manage the inner micro-climate zone between the body and the garment by creating a dual moisture shield against the damp and cold. FXR's ACMT™ HydrX Pro™ combination is guaranteed to keep you dry, warm and comfortable during high intensity rides.

FXR's Thermal Flex™ insulation is a powerful blend of polyester fiber fill that provides exceptional warmth and flexibility at any temperature. Unlike other fiber fills, which often become stiff in cold weather, our Thermal Flex™ insulation provides superior comfort, mobility and warmth season after season, wet or dry. Our trade-marked insulation is used in both fixed and removable liner systems, in both jackets and pants meaning all of our products come with unbeatable heat retention abilities.

The new Dry Vent™ System is a high performance venting system that maximizes ventilation in radial side body vents and the chest of FXR jackets and the inner and outer thigh of FXR pants. Seam sealed venting mesh eliminates snow ingestion in all snow conditions, including bottomless powder or wet snow. It uses the cold air entering the vents to exhaust the warm air built within the inner microclimate between your jacket/ pant and base layers. FXR's trademarked Dry Vent™ System is 99% more effective at controlling your core temperature and keeping you dry than any waterproof/ breathable system on the planet.

Key to the overall comfort, warmth, and breathability of the garment.
Remains flexible at any temperature.
Allows for maximum breathability through moisture-wicking mesh layers & Thermal Flex Insulation.

EXKIN® PLATINUM® is the ultimate technology for increasing warmth. Exkin® Platinum® thermal technology maintains warmth, prevents heat loss and retains insulating properties even when wet. Lightweight construction does not compromise mobility by adding bulk. Added to the back and chest of FXR products, it adds warmth to places that lose the most from being exposed to the wind.

F.A.S.T. insulation is made from an expanded, low-density polyethylene foam membrane that offers buoyancy assistance for up to two hours. The floatation membrane construction has excellent insulation properties, even when wet, which is integral should you be submerged. The F.A.S.T. membrane is also moisture resistant and lightweight, which allows the user to retain excellent warmth and mobility.
IMPORTANT – FXR jacket and pants with F.A.S.T. must be worn together as a suit to achieve buoyancy properties. Additionally, F.A.S.T. items will be rendered ineffective in adverse conditions such as strong water currents. F.A.S.T. equipped products provide exceptional mobility, warmth, style, and attention to detail while offering buoyancy properties, but are NOT COAST GUARD APPROVED.

Omni Stretch™ shell material provides maximum stretch and mobility, while allowing the shell material to take impacts from trees and rocks, with minimal chance of snagging or tearing. Omni Stretch™ is extremely durable and provides the greatest amount of stretch in a rugged shell material in the industry. Available in select premium FXR Jackets, Pants and Monosuits.

HydrX™ is FXR's exclusive Single Layer Moisture Shield that is applied to the outer shell of FXR products. HydrX™ is applied as a single layer laminate in mid-level FXR garments and a single layer coating in entry level FXR garments

Provides protection from the elements like a monosuit with the higher inseam and mobile fit of a two piece. Extremely versatile for both short and tall riders alike and allows increased mobility and proper fit. When both pieces are attached, the Dri Link™ allows increased warmth for colder days while removing the Dri Link™ on warmer days provides maximum cooling and air exchange.

COLD INSULATED RATING ICONS

UNINSULATED

MILD WEATHER / AGGRESSIVE RIDING GEAR

A value of 1 has no thermal insulation and is suitable for mild climates or situations where intensive perspiration occurs.

INSULATED

COLD WEATHER / LOW ACTIVITY RIDING GEAR

Values between 7-10 have extremely high thermal properties and are able to withstand extreme temperatures, well below -40°C/F and will keep you warm during sedentary outdoor activities.

INSULATED COMBO

SHELL & FIXED LINING COMBINED INSULATION RATING

If the item is a 2-in-1 or 3-in-1 (indicating it has a removable liner), both the "SHELL" and "COMBO" (combined) value of the shell and liner will be displayed.

BOOT STIFFNESS SCALE

STIFFNESS

FXR rates its boots for warmth and stiffness to allow riders to select the boot that most suits their riding style and preferences. A stiffness rating of 10 indicated maximum rigidity and support for aggressive riding, while a stiffness rating of 4-5 indicated more flexibility for comfort and ease of walking/casual use.

SCAN FOR DETAILS

- Bold FXR graphics
- Removable, washable comfort liner features Genuine Dri-Lex® anti-bacterial fabric
- Emergency Quick-Release Cheek Pads
- PU-over molded EPP lined chin bar includes Sternum Pad
- Goggle band integrated shell recess at the eyeport area improves goggle fit and seal
- Shear-Away Visor Screws designed to reduce angular acceleration potential
- Nose guard provides improved roost protection
- Titanium D-Rings
- Light weight with improved center of gravity (+/- 1480 grams Size M)
- Exceeds DOT, ECE, ACU and ASTM Standards
- 3-Year Limited Warranty

REBUILDABLE ODS SYSTEM:

- Patented Omni-Directional Suspension® (ODS®)
- Improved ODS design mitigates Angular and Linear Accelerations
- Replaceable Inner EPS Liner
- Multi-impact EPP Outer Liner incorporates Isolation Damping Towers
- Rotational Energy Management Disks reduce Angular Acceleration
- Superior low, mid, and high velocity impact mitigation
- Air-Gap Ventilation System with 17 Transfer Ports

SHELL:

- Optimized compliant light weight Tri-Composite Shell provides superior energy absorption
- 3 Shell Sizes optimize the size to weight ratio
- Rear lower shell incorporates compliant zone at the cervical spine location
- Brow Rib increases shell integrity above the eyeport
- Clavicle Cut-Away provides increased clearance
- 9 Intake Ports and 6 Exhaust Ports work in unison with the Air Gap Ventilation System

Youth		6 3/8	6 5/8	7				
Child	5 1/4	5 7/8	6 1/8	6 3/8				

Measured from base of wrist to top of middle finger.

HOW TO MEASURE

For the best results, have another person take measurements, while wearing light clothing. Tape measure should be snug, but not tight.

- | | |
|-----------------|---|
| 1. Chest | Measure under arms around fullest part of chest |
| 2. Waist | Measure around natural waist line |
| 3. Hip | Measure around fullest part of lower hip with feet together |
| 4. Inseam | Measure from crotch down inside of leg to floor (without shoes) |
| 5. Sleeve | Measure from center back of neck, across shoulder, down length of arm to wrist bone |
| 6. Gloves/Mitts | Measure from wrist to top of middle finger |
| 7. Headwear | Measured at top of head above ears and eyebrows. |

ADDITIONAL SIZES: In many FXR products, specific colourways will have additional sizes, including short and tall variations. The **ADDITIONAL SIZES** of these products will be italicized within the **SIZING CHART** with a corresponding * to indicate which colourways have **ADDITIONAL SIZES**.

NOTE: ALL TALL, SHORT, 2XL & UP (in Men's) and TALL,SHORT,18 & UP (in Women's) SIZES WILL INCREASE THE PRICE OF THE PRODUCT BY \$20.

Print page, measure the overall length to ensure the sizing is accurate.

WARRANTY

FXR warrants our products to be free of defects in materials, contents and workmanship. Our products fall into two distinct warranty categories: Snow outerwear, helmets, gloves, boots, and goggles are covered under a 3-year progressive warranty Race Division and Lifestyle collections, along with all other product not listed above, are covered for 1 year*

An FXR Return Authorization is required for all FXR returns, including warranty. Items without a return authorization will not be processed and will not be returned. For warranty service, if an exact replacement is not available, then one of equal value in the same size and color will be issued. All repaired warranty product will be covered for the remainder of the warranty period, from the original purchase date.

For all purchases of FXR product through a dealer/store, please return to the retailer with the original proof of purchase. If upon inspection by the dealer and FXR's warranty department, the warranty claim is deemed as valid, then FXR will repair, or replace the product at our discretion.

All items being sent for repair, are required to be clean before forwarding for warranty service. If the garment received by our warranty department, is not deemed as clean, then a \$25 cleaning fee will be issued and will be payable before return of the garment. Any fees incurred and not paid within 30 days of invoice will forfeit all warranty service.

FXR's warranty is not applicable if:

- Damage was the result of an accident
- Damage due to improper maintenance, or care
- Damage due to neglect, or normal wear and tear

Some examples of damage not covered by warranty are:

- Material that has been snagged, ripped, torn, punctured, abraded or burned
- Fading from sun exposure, staining, improper washing care, or failure to follow FXR's care instructions

Every product is susceptible to normal wear and tear though the lifetime of the product. The term Lifetime/Lifespan does not apply to the owner's lifetime. Our product is not meant to last the lifetime of the owner but the lifetime of the product. The lifetime of the product can be accelerated through high frequency and/or aggressive use, or through age itself, and can contribute to advancing the rate of natural breakdown of the product.

FXR is a premium apparel company and carries warranty on all FXR products. Satisfaction for every customer is the primary goal with every FXR Racing product.
